

Garret Hosey

garret.hosey@icloud.com //(859)-327-8823

1879 Bellefonte Dr. Lexington, KY

Education

Virginia Tech, Blacksburg, VA

B.S., *Mechanical Engineering*

GPA 3.66/4.00

Biomedical Engineering minor

May 2027

Skills

SolidWorks, MATLAB, Excel, Word, Microsoft Project, Minitab, Wolfram, OnShape

Shadow/Internship Experience

Nexgen Aviation Jet Management and Flight School

March 2023-May 2023

- Ensured planes were in flying condition by performing Oil changes, systems checkups, etc. in collaboration with maintenance technicians
- Learned about the regular maintenance necessary for planes as well as some of the unexpected issues that can arise
- Acquired experience working with single propellor planes

University of Kentucky Physical Therapy

November 2022- February 2023

- Observed patient appointments and worked with physical therapist to diagnose issue and suggest exercises for recovery
- First-hand experience using understanding of biomechanics to improve patient health
- Gained greater understanding of difficulties in the post-surgery recovery process, learned more about anatomical functions and how they deteriorate with age, and gained experience engaging with patients

Personal Projects

Electric Guitar Design and Build

May 2026-June 2026

- Designed and manufactured electric guitar body that houses multiple components, resulting in fully-functioning electric guitar
- Experienced the full process of product development including planning, problem scoping, design, and manufacturing
- Learned various new skills such as woodworking, soldering, and budgeting in order to implement my design at a reasonable cost

Motorized TV Lift Housing Design and Build

July 2026

- Designed and built a TV console with a motorized lift inside, allowing for the TV to be hidden when not in use
- Planned dimensions of console and prepared a list of necessary plywood pieces needed in order to build the design
- Constructed a unique piece of furniture using basic woodworking tools and careful planning

Work Experience

Spinnaret-Based Tunable Engineered Parameters Lab (Lab Technician, 40hrs/week) May 2025-January 2026

- Manufactured nanofiber networks and conducted research experiments/analysis on those networks
- Contributed to the design, data collection, and analysis of multiple research projects
- Gained real-world problem solving experience, as well as data storage and organization skills

Keene Trace Golf Club (Range Attendant, 32 hrs/week)

May 2024-August 2024

- Commuted between two golf courses to keep driving ranges stocked and organized at both facilities
- Maintained a consistent 9-5 schedule for four days per week
